

Fossil Find

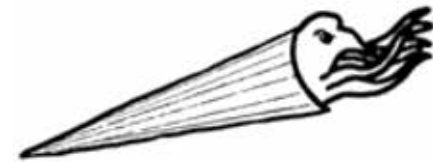

Colour the sections marked with a dot to find the fossils. Then, match the fossils to the creatures. How many of each creature did you find?

Sunflower Coral

Brachiopod

Nautiloid

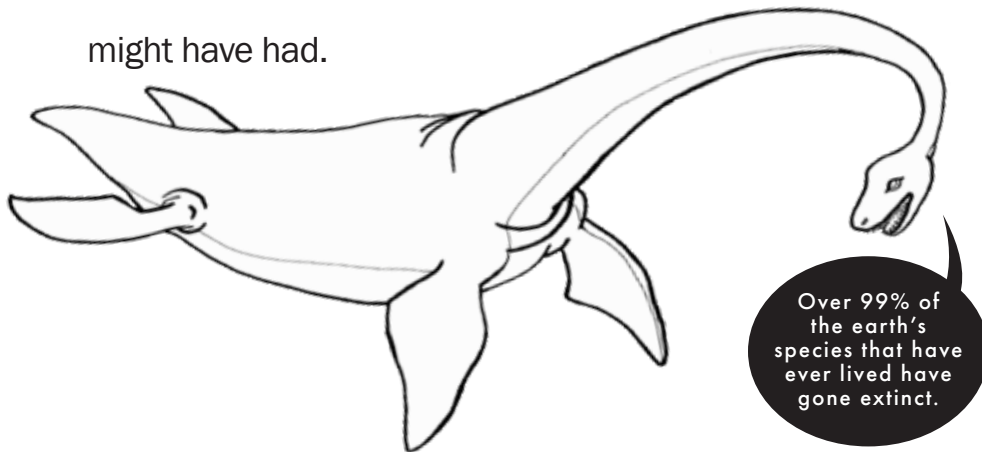

Snail (Maclurite)

Grades K-3 | Downstairs Galleries

1. Scotty the *Tyrannosaurus rex* weighed 20 000 pounds — that's the same weight as about 400 grade 2 students! Walk beside Scotty the T. rex from nose to tail to see how many steps long they are. _____

2. Does the large coprolite (fossilized poop) belong to a carnivore or herbivore? _____

3. The markings on the Plesiosaur in the gallery are just a guess. Draw the markings you think the Plesiosaur might have had.

4. Find the large fossil bone hanging on the wall that says "touch me" and see what it feels like. What bone is it?

Can you feel your shin bone between your foot and your knee? _____

5. If dinosaurs and other prehistoric creatures were alive today what foods do you think they would like?

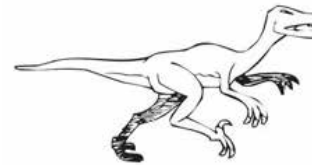

Edmontosaurus

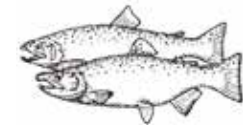

Plesiosaur

Tyrannosaurus rex

Troodon

6. The Brontothere had two horns on its nose. What modern-day animal has a horn on its nose? _____

7. Not all fossils are from animals; plants can become fossils too. Find the fossil tree stump. How many tree rings can you count? _____
