

# GRADUATE STUDENT Opportunities in Entomology

We are looking to fill two to three MSc positions at the Royal Saskatchewan Museum and the University of Regina, investigating the responses of bees to landscape characteristics and land use patterns associated with crop and unmanaged land using a range of pollinator sampling methods. The research will take place in southern Saskatchewan.

## QUALIFICATIONS

Students will meet the enrollment requirements for graduate studies at the University of Regina but will be based at the Royal Saskatchewan Museum.

## HOW TO APPLY

Please send your CV, list of references, academic transcripts, and a cover letter summarizing your interest and experience to:
